OPEN DEI TASKFORCES AND WORKING GROUPS

Are you interested to join to a cross-sectorial data space task force?

■ YES
■ NO
■ NA

TASKFORCES

Cross-sectorial Taskforce:
- Data platforms
- Data sharing

Coordinator:
IDSA

Cross-sectorial Taskforce:
- Ecosystem building

Coordinator:
Innovalia

Cross-sectorial Taskforce:
- Large Scale Pilots Dashboard

Coordinator:
Atos

Cross-sectorial Taskforce:
- KPIs

Coordinator:
IDC

WORKING GROUPS

Manufacturing domain Working groups:
- Standardisation
- Dissemination on events
- Joint research activity
- Performance management and KPIs
- Market Analysis and Business Models
- Open Calls
- Platforms
- Pilots

Ambassador:
Mrs. Carmen Polcaro (Innovalia)

Agri-Food domain Working groups:
- Use Cases
- Communication and Dissemination
- Tools and methods
- Standardisation and Business sustainability

Ambassador:
Mrs. Mariana Faraldi (TecnoAlimenti)

Health-care domain Working groups:
- Dissemination
- Use cases
- KPIs
- Architecture
- Standards
- Re-usable components
- GDPR implementation

Ambassador:
Luc Nicolas (EHTEL)

Energy domain Working groups:
- Dissemination
- Use cases
- KPIs
- Architecture
- Standards
- Re-usable components
- GDPR implementation

Ambassador:
Alberto Dognini (RWTH)

The ambassadors communicate with the project's coordinators and the WG leaders

Over +27 projects from 4 domains

Industry stakeholders

Project coordinators

Initiatives

Carmen Polcaro

4 Ambassadors

Communication and contact with project

Communication

Internal communication through working groups, taskforces and box tool.

External communication through social media, fairs, events, interviews and articles.

Leader: IDSA

ANALYZE THE FUTURE

INTERNATIONAL DATA SPACES ASSOCIATION

Cross sectorial data spaces task force' objectives

Analyze and discuss

Analyse and discuss common challenges for data exchange.

Coordinate and work

Coordinate and work together on needs for effective governance of data exchange.

Share

Share knowledge, best practices and create a network of cross-sectorial data sharing stakeholders.

Develop

Develop recommendations for upcoming policies of EC and MS to support data exchange initiatives and for standardisation activities.

Cross sectorial data spaces task force' activities

During the registration process we launched this question:

Which topics do you consider more interesting for a cross-sectorial task force?

Data spaces framework

IDS RAM – Layers and perspective

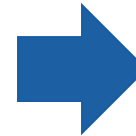

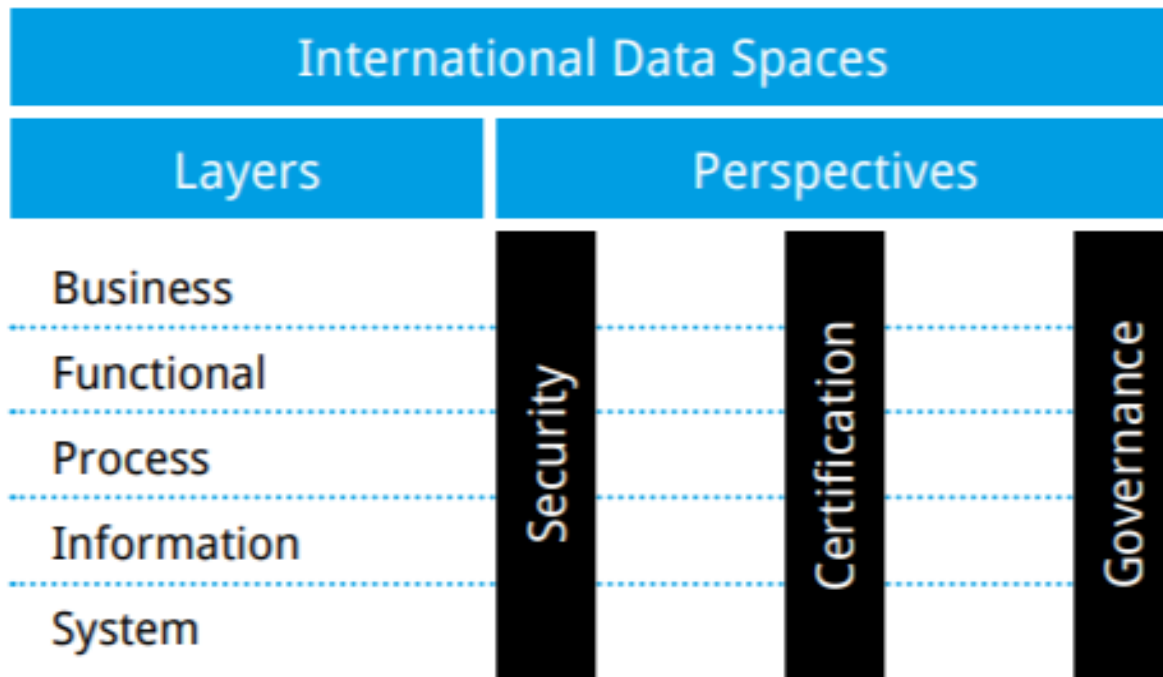

- Business Layer: required roles & interactions. Digital identities. Usage contracts.
- Functional Layer: ecosystem of data. Standardized interoperability
- Process Layer: exchanging data. Publishing and using data apps.
- Information Layer: Model representations. Vocabularies. Data app interfaces.
- System Layer: secure data connectors, broker, data apps and app store.
- Security perspective: cover security aspects in different layers
- Certification perspective: certification process.
- Governance perspective: governance addressed in different layers and data governance

Cross sectorial data spaces task force' activities

During the registration process we launched this question:

Which topics do you consider more interesting for a cross-sectorial task force?

Data spaces framework

Topics prioritizing	Total votes
Processes for data exchange	91
Data driven services (roles and interactions)	89
Standards for data interoperability	85
Data governance	68
Common components & technologies	62
Security aspects	60
Business models representation	57
Legal agreements & certification	40

Online consultation - a European Strategy for Data

Submit your views on the European Commission's European strategy for data

09/03/2020 Europe

Have your say ON THE EUROPEAN STRATEGY FOR DATA

In February, the European Commission (EC) launched a public online consultation to gather views on the European strategy for data. The aim of the European strategy for data is to create a genuine single market for data which includes sensitive business data, are secure. Thus, businesses, innovators and public authorities will have access to an infinite amount of high-quality data, boosting growth and creating value, whilst minimising risks.

This consultation will close on 31 May 2020. The results of this survey will contribute to the development of the European strategy for data. Access the public online consultation ["here"](#).

To keep up to date with more open data [news](#) and [featured articles](#), follow the EDP on Twitter.

Deadline for contributions: 31 May 2020

European Strategy for data

Fields marked with * are mandatory.

Introduction

Europe is undergoing a digital transition that is changing our societies and economies at an unprecedented speed. Data is at the core of this transformation. It has an impact on all economic sectors and also on the daily lives of citizens.

The aim of the European strategy for data is to create a single European data space: a genuine single market for data, where personal as well as non-personal data, including confidential data, are secure. This will make it easier for businesses and public authorities to access an almost infinite amount of high-quality data to boost growth and create value, while reducing the carbon footprint of the EU economy.
