

## Operational Digital Platforms to Booster the Digitalization of European Networks

*3 March 2022 (14.30-16.30)  
Webinar and Interactive Workshop*

### Scope

This event will highlight the main approaches, challenges and future trends of digital platforms for Energy sector at European level. We will analyze, together with re-known field experts, the technologies and building blocks necessary to enable a cyber-secure Internet of Energy and an optimized transport system along major European pathways. The scene will be set to present and discuss the Call for Proposal of the Commission’s Connecting Europe Facility - Digital (CEF - Digital): Operational Digital Platforms.
